

IVY WAMUYU NGATIA

Software Engineer

Location: Nairobi, Kenya | Phone: +254 113 431396 | Email: iwamuyu856@gmail.com | GitHub: github.com/Ngatiah

PROFESSIONAL SUMMARY

Final year BSc Computer Science student with practical experience building web applications and AI-driven software projects using Python, PHP/Laravel, React, SQL and Git. Experienced in taking projects from requirements and data processing through implementation, debugging, testing and iteration. Strong focus on maintainable code, REST API, database architecture and collaborative engineering.

TECHNICAL SKILLS

Languages & Framework: React, JavaScript (ES6+), Python, PHP (Laravel - Practical), SQL, HTML5, CSS3, Bootstrap

Databases & Cloud: MySQL, Firebase (Realtime DB & Auth), PostgreSQL, Relational Database Design

IT Support & Systems: Microsoft 365 Admin, Active Directory, Microsoft Intune, Hardware/Software Diagnostics, VPN Setup

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Linux (Ubuntu), Postman, Streamlit Cloud

Certifications: Cisco Networking Basics, 10 Kaggle Certifications : Computer Vision, Data Cleaning

WORK EXPERIENCE

Kenya-Wellcome Trust Research Programme (KWTRP)

Kilifi/Nairobi, Kenya

IT Support/Service Delivery Attachment

- Provided Tier 1/2 user support across multi-site teams, administering Microsoft 365 accounts and Active Directory permissions.
- Managed device enrollment, policy enforcement, and security compliance using Microsoft Intune and BitLocker.
- Executed automated Windows OS deployments, device staging, software provisioning, and hardware troubleshooting.
- Resolved network connectivity, printer, and application issues within SLA guidelines during daily service desk operations.

KEY TECHNICAL PROJECTS

Explainable AI Resume Matcher

NLP / Python / Streamlit

- Developed an AI application matching resumes against job listing while providing interpretable explanations for match scores rather than black-box outputs
- Applied NLP and text-processing algorithms to calculate relevance between candidate skill and role requirements.

Task Management Applications

Front-End & Back-End Implementations

- **React & Firebase Application:** Built a dynamic task tracking UI leveraging React component architecture with Firebase real-time database synchronization and user authentication.
- **PHP/Laravel Application:** Developed a backend-driven MVC task management system implementing CRUD operations, relational MySQL schema design, and session-based auth to expand server-side development skills.

EDUCATION

Moi University

Graduation: Dec 2026

BSc Computer Science (Completed – Awaiting Graduation)

Moi Girls High School, Eldoret

KCSE: Grade A-
